## Invest in Jersey Property

The character of the Channel Islands is unique, a mix of international jet set, affluent professionals and family businesses. The climate is mild all year, averaging 68 degrees fahrenheit during the peak visitor season of June to September.

However, tourism accounts for only 4% of Jersey's economy. Banking and Financial Services is a well-established and vital part of the Island, where over 80% of the local economy is accounted for by the offshore finance sector, dwarfing other major Channel Island industries such as agriculture and manufacturing.

## Location

Situated 90 miles south of England, the Channel Islands are easily accessible by air and sea from both the UK and Europe, suffusing them with a unique, continental flavour whilst ensuring they stay undeniably British.
